

POLYBRIGHT NEWSLETTER N°2

April 2012

Dear all,

Here comes some new information concerning the European Project [PolyBright](#) „Extending the process limits of laser polymer welding with high-brilliance beam sources“.

Please find here the

▶ [Latest public project results & highlights](#)

In the frame of the exhibiton and congress “Industrial Technologies 2012”, Polybright has a **common stand** with the [Alpine](#) Laser project and will present a poster.

You are kindly invited to visit our stand:

▶ [Industrial Technologies 2012](#)

Date: June 19-21, 2012

Location : Aarhus, Denmark

Feel free to forward this information to any of your colleagues who might be interested. Thanks!

If you have any questions you can contact us on: polybright-info@eurtd.com

Housing and closure of the new catheter “SpeediCath Compact Male” developed by Polybright partner Coloplast. This new product is designed for maximum discretion, and the catheter inside is telescopic to make it half the length compared to a normal catheter. The catheters are for men who have to catheterize themselves, and have been designed to look different from medical products. Production processes and materials are optimized from learnings in the Polybright project.
